

## *Congratulatory letter*

**Dr. Peter KASALOVSKY**

Administrator and Executive Chairman  
of The Association Informal Economic Forum Economic Club

First of all, congratulations on the establishment of "international peace committee and its foreign members", which will be an important social force for the development of world peace and be recorded in human civilization development history with its great social contribution. Human development has gone through iterative war and peace, and finally reached the formation of the United Nations 70 years ago, which secured the world peace on the whole in the past 70 years. Now people are enhancing the factors maintaining the peace of the world in accordance with real-world problems, it is fortunate for mankind, I believe this is the mainstream thoughts of human leaders, among which you are the most prominent representatives.

I, as a scientist and the inventor of regenerative life science, can only provide humans with the technique for achieving regenerative lives to let the world leaders lead the mankind into the "world of regenerative humans" and establish a new order of peace in the new world.

In order to congratulate you on establishing "International Peace Committee and foreign members", I hereby report our plan of promoting the implementation of human body regenerative restoration science (HBRRS) - world of regenerative humans.

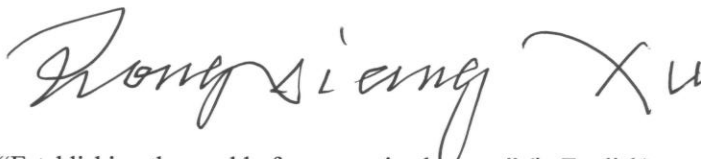

1. Promotion in international society: we, as the member of "Clinton Global Initiative" (CGI), our plan of establishing the "world of regenerative humans" has been enrolled in this year's CGI global promotion topics, with the first program of training international doctors to be masters capable of achieving regenerative restoration of diabetic foot, which will be launched this year for the sake of helping worldwide diabetic patients rapidly avoid amputation and using the actual results to facilitate humans understanding regenerative life and expecting the future of regenerative life.

2. Promotion in the way of national policy: "Damaged organ regeneration" part (also the main content of the patent awarded by your club) of our HBRRS was included into the national life science development policy by the US president in 2013. This year, the US government planned to implement fully this policy. Implementation plan of this US national policy will be submitted to the UN Secretary General to share with Presidents of the member states, forming the "World leader committee for regenerative humans" consisted of the inventor, Mr. Clinton, the US president, the president of China and the presidents of states volunteering to implement the national policy of damaged organ regeneration. The mission of the committee is to lead the mankind to establish a new peaceful world of regenerative humans, achieving healthy longevity and new life resulted from everyone's own regenerative life.

I could not attend your inaugural meeting in person due to my work schedules, hereby I'm writing to congratulate the international peace committee and wish all the participants healthy longevity!

Inventor of HBRRS and Initiator of "Establishing the world of regenerative humans"

Rongxiang Xu
